

Aglow in Port Charlotte 4-3-2010

There was much inner healing as Dianne spoke about the black spots in her life. The healings occurred sovereignly as she spoke and those that were healed came up later to testify and receive a personal touch.

The black spots Dianne related occurred as she was growing up with things like being told she was stupid. She mentioned when she was sexually abused. And when they listed her in the High School yearbook as the one least likely to succeed. Then there was the time the Dean at college told her to quit wasting her father's money.

She spoke about how she put up walls around herself to protect herself. She created her own image to live to instead of what the world was telling her.

Dianne had a Word of knowledge about heaviness in the chest. Several ladies came forward and received healing.

One lady was using a walker and had been living in a rehab place since last July. She was unable to stand or walk without help. Dianne prayed with her several times. She told Dianne she felt as though she was in a warm whirlpool. Dianne compared it to the waters of Bethesda. The first time Dianne prayed she stood up unaided. The second time she stood with more strength and with holding on to Dianne she took a couple of steps. The third time she shot up out of the chair and stepped unaided about six steps.

While Dianne was praying for her, the woman spoke about being a light to others at the rehab place. Dianne told her the season is over and you need to go back home. She agreed.

It was a spirit filled morning beginning with worship as the Holy Spirit guided the direction of Dianne's message and the anointing for healing filled the room and continued throughout the morning as worship music continued through the ministry time.
